TWO-IN-ONE Semi-Automatic Winder W8-905-2E

The Semi-Automatic Winder W8-905-2E continues a tradition of high quality, low maintenance machines and has been designed to enable a flexible winding application due to individual driven of each spindle. This new designed winding machine allows winding of different materials, wire sizes, number of wires at same time in one machine.

A servo motor traverse system allows the operator infinite control of the wire guide pitch and ensures precision lay control at the bobbin flange. The W8-905-2E winder ensures the highest quality bobbins for optimal braider performance.

Support

Complete Braiding & Winding Solutions

Application

- High-speed parallel winding for Wire and Textile
- For use on a variety of bobbins

Configuration

- 2 spindle arrangement
- Siemens Operator controls
- 220 V AC motor drive, single phase

Options

- Wire lubricator
- Wire break sensor

Technical Features

- 2 x 0,55 kW AC motor for drive
- 2 x 0,25 kW Servo motor for traverse
- Set variable winding pitch and traverse limits from operator panel
- Constant spindle speed or constant linear speed
- Multi-language display
- Small footprint
- CE compliant

Model

W8-905-2E

Line Speed (rpm)

0 - 6000

Bobbin Dimensions (ODxOAW)

125 x 167 mm

Power Supply

220 V AC

Material to be wound

Wire and textile

Jog speed

50 rpm

Max. pulling torque/spindle

0.8 Nm

Traverse

adjustable

Motor(s) for drive

2 x 0.55 kW

Weight

300 kg

Floor Space (mm)

1500 x 1100 x 1100
