Automatic Winder W8-942S

Modular bobbin magazine rack holds up to 40 empty bobbins and allows quick bobbin style changes.

The latest versions of the fully automatic winder include many upgraded features, including a model that can split multi-wire reels on to multiple bobbins. Other improvements include a new touch screen operator panel with a graphic display of the winders operation. The winders operate at up to 8000 rpm spindle speed or constant linear speeds up to 850 meters per minute. The winder also has an easily modified empty bobbin rack and the ability to store programs for various types of bobbins and wire sizes allowing for fast and efficient product changes.

Lastly, the winder becomes even more operator friendly with numerous ergonomic upgrades like a more open winding field and a lowered working height.

Complete Braiding & Winding Solutions

Application

- Parallel Winding
- Textile or Wire
- For use with flanged bobbins

Configuration

- Pneumatic snap closure system
- Optional clip securing system
- Empty and full bobbin supply racks
- Complete guarding
- Optional set-up for splitting wires from multi-wire reels

Technical Features

- Electronic traverse
- Siemens controls
- Multi-language display
- Fully programmable
- Wired to customer's specifications

Options

- Wire lubricator
- Wire break sensor

Model	W8-942S	W8-945S
Line Speed (rpm)	500 - 8000	500 - 8000
Bobbin Dimensions	110 x 250 mm	All standard bobbins
Bobbin Magazine Capacity	up to 40	up to 40
Material to be wound	Wire and textile	Wire and textile
Wire Size	25 to 45 AWG	28 to 44 AWG
No. of Ends (per spindle)	1 to 10	1 to 10
Traverse	Infinitely adjustable	Infinitely adjustable
Motor(s)	2.2 kW brushless	5 x 0.8 kW brushless
Air Requirements	nl 15 at 5 bar	nl 15 at 5 bar
Weight	500 kg	600 kg
Floor Space (mm)	1800x1030x1500	1800x1030x1500
